Minumum object distance (MOD)	298 mm
Mass	25 g

MOD: Minimum object distance from the edge of the lens body to the photo subject.

NOTE

All dimensions shown are in mm

Lens Accessories

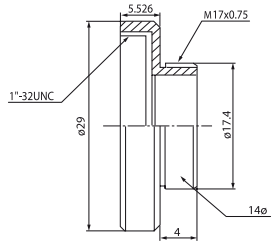
C Mount adaptor

LO-999CMT

C mount adaptor

When a C mount type lens is attached, a C mount adaptor (LO-999CMT) is required.

Mass	12 g



Be sure that the lens does not project more than 4.1 mm from the lens mount.

For setting the camera when using C mount adaptor, fix the lens mount (C mount) instead of fixing the camera head in order to avoid applying unnecessary forces to the camera head.

Avoid using C mount adaptor in the places where vibrations or shocks are applied often. Doing so will damage the equipment or loosen the connection.
